

# ENVIRONMENTAL REVIEW PROCESS

PRPA will need to fulfill its responsibilities under Section 82 of the Impact Assessment Act (IAA) and make a determination of significance on whether the proposed works and activities has the potential to result in a significant adverse environmental effect. Transport Canada is contributing funding to the project, and will also need to complete a similar determination.

**In reaching a determination, the following will be considered**

- Potential impacts and mitigation measures
- Comments received from the public
- Indigenous knowledge received
- Adverse impact on Indigenous peoples and their rights
